HOW TO BUILD A PART NUMBER

0000 - **0000** - **000**

THE FIRST FOUR DIGITS

in our part numbers identify the series of product and determine the converting process. Increasing the non-perforated product number by 50 identifies most Perforated products.

THE SECOND FOUR DIGITS

identify the material converted size. The first two digits indicate the width and the last two digits indicate the length.

THE FINAL THREE DIGITS

identify the color. All colors contain three digits.
